## SAILUN GROUP

Stock Code: 601058

Ranked 15th among global tire manufacturers

Over 13,000 employees worldwide  
committed to meeting your needs

Our global facilities include 4 R&D centers, 10 sales centers and 7 manufacturing centers, with products sold in over 180 countries and regions

## WHY SAILUN ?

### GLOBAL INTELLIGENT MANUFACTURING

Sailun has 7 smart tire production plants located in China, Vietnam and Cambodia. These factories utilize big data cloud platforms tailored to meet tire production demand and keep pace with the organization's rapid growth. This allows for the real-time optimization and intelligent management of manufacturing and supply chain networks in order to improve the quality and efficiency of supply chain operations.

### LEADING R&D SYSTEM

Sailun has invested heavily in setting up R&D centers in Qingdao (R&D headquarters), Vietnam, Europe and North America that enable us to better understand and meet local user needs. These centers employ cutting-edge technology that establish a sophisticated global R&D network. From market research, product planning, and tire structure design to product verification and testing throughout the entire development process, the R&D network has the capabilities to develop a full range of products specifically designed to meet market needs.

### SOPHISTICATED PRODUCT DEVELOPMENT

Sailun offers 10,000 products for PCR, TBR and Specialty that are developed to meet customer and consumer demands. This market oriented approach ensures the correct understanding of product applications, product quality, and overall performance.

### ESTABLISHED BRAND

Brand value is not only reflected in Sailun's product quality, but also in every stage of the product life cycle. For over 20 years Sailun has cultivated a brand that has gained the trust of customers and will continue to invest in building a world-class brand to solidify its standing as an influential global tire manufacturer.

### LOCALIZED CUSTOMER SUPPORT

Sailun continues to maintain the business strategy of 'Think Global, Act Local'. Customer support channels have been established around the world including Toronto, Boston, Germany, Vietnam, Dubai, Brazil and more, and are equipped with professional staff who can provide local technical, sales, and marketing support.

# EcoPoint<sup>3</sup>

TECHNOLOGY

## SUSTAINABLE PERFORMANCE

### What is EcoPoint<sup>3</sup> & Why choose it

- A well-dispersed silica is combined with polymer sloution of SBR and BR
- Utilizing the advanced automated Liquid-Phase Mixing technology compared to conventional dry-mixed silica compounds
- Has properties aligned with HIGHEST tire胎面 ratings

### Why is it significant

- Better filler-polymer interactions
- Higher tensil strength
- Minimal proportions of impurities

### Revolutionary benefits

-  SIGNIFICANT IMPROVEMENTS
  - Rolling Resistance
  - Skid Resistance
  - Wear Resistance
-  MAXIMUM ENERGY EFFICIENCY
  - Use less and travel further

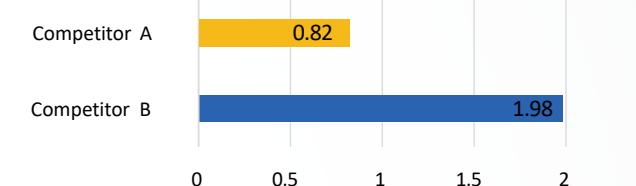

-  REDUCED CARBON EMISSIONS
  - Uses more sustainable materials and reduces fuel consumption
-  LOW-CARBON DEVELOPMENT
  - From raw materials, manufacturing to product life cycle

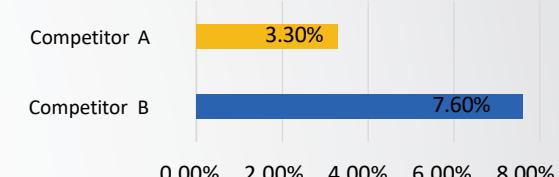

### Fuel Economy

	Sailun Group Long Haul Series RR Grade	Tier 1 Competitor A Long Haul Series RR Grade	Tier 1 Competitor B Long Haul Series RR Grade
Steer	A	B	B
Drive	A	B	B
Trailer	A	B	A

Fuel Saving Performance Compared to Competitors (L/100KM)

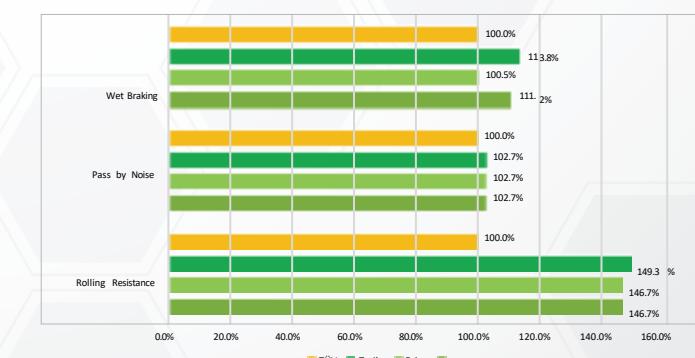

Fuel Saving Performance Compared to Competitors (%)

Our products showed better fuel consumption performance of 3.3% compared to Competitor A and 7.6% compared to Competitor B (fuel consumption L/100km).

- Our product's Fuel Consumption (L/100km) was 23.99 compared to Competitor A (24.81 L/100km) and Competitor B (25.97 L/100km).
- @ 200,000km can save ~1640 L and ~3,960 L comparatively.

### TUV Testing

# VISION

Become a globally recognized company in the tire industry by 2025 through the establishment of technological autonomy and intelligent manufacturing.

## TECHNOLOGICAL AUTONOMY

Sailun Group has invested heavily in setting up R&D centers in Qingdao (R&D headquarters), Vietnam, Europe and North America. These centers establish a sophisticated global R&D system which enables Sailun to better meet user needs at a local level and develop products that meet their needs. From market research, product planning, and tire structure design to product verification and testing of the entire development process, the R&D system provides the capabilities to develop a full range of products designed specifically to market requirements.

**SETC in Europe**

### THE TIRE AND RIM ASSOCIATION INC.

In 2016, Sailun joined the US Tire and Rim Association Inc., a significant step towards becoming an organization of international standards.

## PATENTS

Sailun has filed over 460 invention and design patent applications, and has been involved in establishing 130 international industry standards.

## STANDARDS

Sailun's products have received certification in 20 countries including China's CCC, US's DOT, Europe's ECE, Brazil's INMETRO and GCC in the Middle East. Sailun has also been awarded certification for meeting IATF16949 quality management system, ISO14001 environmental management system and OHSAS18001 occupational health and safety management system standards. Sailun's laboratory has also obtained Spain's IDIADA and Germany's TUV certification.

## PROFESSIONAL LAB TESTING

Sailun's R&D center is an industry-leading facility equipped with a professional tire laboratory, which has received CNAS, TUV, IDIADA, CCC, ISO9000, DOT, ECE, INMETRO, SONCAP and other certifications.

## BRAND INTERNATIONALIZATION

Sailun continuously pursues brand internationalization through strategic partnerships including becoming the official partner of FIA, IDC, D1GP, RDS, CDC, CDB drifting competitions and top tier football clubs such as La Liga's Valencia CF.

**Sailun Tire Drift Team crowned seasonal champions in solo and drift chase runs at Japan's D1GP**

**Sailun Tire Sponsors Thailand's Grand Prix International**

Twenty-five distributors from Asia were invited to experience the performance of Sailun's racing tires, a testament to its R&D strength and product quality.

**Sailun became the Official Sleeve Partner and Official Tire Partner of Valencia CF in 2019**

# PASSION DRIVES GREATNESS

# SUPPORTING ADVANTAGES

Sailun has supplied hundreds of tire models to over 50 original equipment manufacturers. Over 20 truck tire models have been distributed to commercial vehicles in China, including light and medium trucks, coaches and public buses. Sailun is also a strategic supplier of specialty tires to Caterpillar Inc., the world's largest construction equipment manufacturer, and other Chinese machinery manufacturers. In addition, Sailun tires have been distributed to nearly 20 mines in China and in 30 other countries.

## S698

Low Heat Generation

The S698 employs a rubber compound which increases the strength of the tread and shoulder for improved tear and scrub resistance, as well as promotes uniform tread wear. The knobs at the bottom of each groove reduce stone retention.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S701

### Fuel-Efficient

The S701 is a drive-position tire for long-distance transportation applications. The specialized tread rubber compound provides excellent scrub resistance. The varied pitch tread design and narrow horizontal grooves effectively reduce tire noise for a more comfortable ride.

L.C.C.

## STL1

### Fuel-Efficient

The STL1 is a trailer position pattern suitable for trucks driving mid-to-long distances on paved roads. The specialized tread rubber compound improves wear resistance, rolling resistance, and reduces heat buildup, thus offering an extended tire life.

L.C.C.													
	Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S606

### High Mileage

The S606 is Sailun's premium steer tire, featuring extra wide shoulders with built-in sipes for excellent stability and traction under all weather conditions. An extra deep 22/32" tread depth ensures the S606 delivers exceptional mileage, while an interlocking symmetrical tread block design promotes even wear and a square footprint.

## S607

### High Wear Resistance

The S607 is a premium regional steer tire, designed with extra wide shoulders that resist curbing damage and stone ejectors to reduce stone retention. Full-length sipes built into tread blocks effectively channel water for exceptional wet traction. A versatile tire, suitable on all regional applications such as delivery trucks, buses, and concrete trucks.

## S609

### Fuel Efficiency

The S609 is a steer position truck tire that offers extremely low rolling resistance for efficient fuel economy. The smooth shoulder sipes promote even wear for extended service life. A strengthened carcass improves overall driving safety.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S621

### High Mileage

The S621 is suitable for medium and long-haul trucks driving on good road surfaces. It is equipped with a special tread rubber compound that provides excellent wear resistance. The unique tread design with deep shoulder grooves promotes even wear. Wide running surface improves the overall ground contact area for better traction.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S628

### Good Handling

The S628 is suitable for mid-to-long distance trucks and busses traveling on highways and normal roads. The main tread grooves offer great handling stability and driving comfort. The balanced shoulder design improves heat dissipation and high speed performance, while the advanced tread rubber compound increases scrub resistance.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S626

### Low Heat Generation

The S626 is designed with a special tread rubber that allows for cool running and improved scrub resistance. The tread also employs four zigzag grooves for greater wet traction, an even ground contact pressure distribution to prevent irregular wear, and superior maneuverability and comfort.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S629

### High Mileage

The S629 is a steer position tire suitable for mid-to-long distance trucks and busses driving on paved roads. The tread compound improves scrub resistance while a unique shoulder design and deep shoulder grooves promote even wear. The wide running surface improves the tire's ground contact area for better handling.

## SFR1

### High Wear Resistance

The SFR1 is a directional position tire suitable for mid-to-long distance trucks and busses running on paved roads. Tread compound improves scrub resistance. Unique shoulder design and deep shoulder grooves help prevent abnormal tire wear. The wide running surface improves the tire's ground contact area for better handling.

## SFR68

### High Speed Handling

The SFR68 is a steer position tire designed with tread sipes that improve heat dissipation, grip and wet skid resistance. The groove design helps to reduce stone retention while the tread pattern is optimized to improve handling at high speeds.

L.C.C.													
	Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S661

### High Mileage

The S661 is a steer position tire for medium and longhaul trucks driving on paved roads. The special tread compound offers excellent wear resistance.

L.C.C.													
	Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S665

### Low Rolling Resistance

The S665 is designed for trucks and busses driving on highway and normal roads. Four main pattern grooves improve handling and driving comfort. The contour design of the tread reduces heat build up, allowing the tire to run cool, and improves high speed performance. New tread compound offers greater scrub resistance.

## S686

### Improved Safety and Mileage

The S686 is a steer position tire that utilizes a tread compound and sipe design to effectively reduce heat buildup, improve wear resistance, and improve safety. Main groove design efficiently funnels water out of the tire for overall improved safety as well as reduces stone retention. The even tread contact area promotes even wear and offers greater handling stability for improved overall driving comfort.

## S702

### Strong Traction Performance

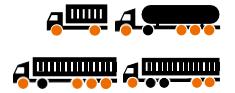

The S702's optimized tread compound improves wear resistance by ensuring the tire runs cool. A rib between the pattern blocks help reduce partial wear and improve scrub resistance.

## S696

### Low Rolling Resistance, Fuel-Efficient

The S696 is a low section tire designed to replace the traditional double-tire style. The special tread rubber compound allows the tire to run cool. Strengthened design improves driving safety.

## S705

### Double-Wide

The S705 is a drive position tire that offers high wear resistance and low heat buildup for an extended usage life. The tread groove and sipe design improves overall grip for better braking and acceleration. A strengthened tread and carcass design improve overall driving safety while the wide running surface improves abrasion resistance and driving stability.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S736

### Strong Traction Performance

The S736 is a trailer position tire for trucks driving long distances on paved roads. The tread is designed to improve head dissipation.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S729

### Improved Mileage

The S729 is suitable for medium and long-haul trucks running on good roads. The special tread rubber compound provides excellent wear resistance. A large block pattern and rib design promote even tread wear. The wide running surface improves overall ground contact area for greater traction.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S761

### Improved Mileage

The S761 utilizes wide, lateral grooves that help improve the self-cleaning capabilities of the tire and ensure a smooth ride.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S753

### Strong Traction Performance

The S753 is a premium drive tire for regional and pickup applications. The interlocking tread block reduces stone retention and improves self-cleaning capabilities. Extra deep grooves (26/32") offer a longer tread life.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S767

### Improved Mileage

The S767's high scrub resistant and cool running tread design ensure an improved tread life and grip. The solid tire structure is reliable and offers great overall performance.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S792

### Strong Traction Performance

The S792 is designed with a horizontal block pattern design that boosts the tires adaptability. A special tread rubber compound improves tire wear and puncture resistance. The groove nodules effectively reduce stone retention.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## SDR72

### Fuel Efficiency

The SDR72 utilizes a wide tread grooves to improve grip and wide tread for better traction and reduced fuel consumption. The Transverse sipes improve traction on wet roads.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)	
CN	315/80R22.5	156/153K	20	19.5	9.00	1076	312	19.69	4000	3650	850	123

## SDR89

### Strong Traction Performance

The SDR89 utilizes a specialised block pattern that improves grip, reduces heat buildup, and relieves stress on the blocks to promote even tread wear.

## SDR73

### Strong Traction Performance

The SDR73 is a drive position tire designed for regional applications. The main groove and block design improve the tires adaptability to varying road conditions.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## STR1

### Low Rolling Resistance

The STR1 is a trailer position pattern suitable for mid-to-long distances on good roads. Specialized tread compound improves wear resistance and rolling resistance. Unique shoulder design promotes even tread wear.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## STR1 +

### Low Rolling Resistance

The STR1+ is a trailer position pattern suitable for mid-to-long distances on good roads. Specialized tread compound improves wear resistance and rolling resistance. Unique shoulder design promotes even tread wear.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S862

### Puncture Resistance

The S862 tread compound is designed to promote even shoulder wear and has increased wear resistance. The winding groove design effectively reduces stone retention.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

CN	385/65R22.5	164K	24	17.0	11.75	1072	389	19.45	5000		930	135

## SAR93

### Even Wear

The SAR93 is designed with a tread compound that lowers heat buildup to promote even wear. Improved wear resistance offers greater mileage and value.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S838

### Low Noise Emissions

The S838 is an all-position tire for standard and heavy-duty vehicles traveling medium and long distances on highways. The tire comes with high abrasion resistance and durability. It is designed to be cost-efficient and ideal for use within 400km.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S880

### Wet Weather Performance

The S880 pattern design improves handling and wet traction while the varied tread pitch lowers noise emissions. A wide running surface improves traction and handling.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S712A

### Excellent Traction

The S712A's robust carcass provides maximum load-bearing capacity. Its special tread design effectively improves self-cleaning properties. The deep grooves provide improved mileage and balanced wear.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S720

### Puncture and Abrasion Resistance

The S720 is a drive position tire equipped with deep grooves that provide the tire with extended mileage and promotes even wear. The four-blck pattern design provides excellent traction and grip performance.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S726

### Puncture and Abrasion Resistance

The S726 boasts a sturdy tire structure to improve load-bearing capacity. Its special tread design boosts overall safety and improves self-cleaning capabilities of the tire. The deep tread helps to promote even tread wear which offers longer mileage.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S758

### Excellent Traction

The S758 is designed for on and off road applications. With an extra deep tread depth and scrub resistant tread rubber, it is prepared for the most demanding environments.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S790

### High Wear Resistance

The S790 utilizes sturdy tread blocks that provide powerful traction and off-road mobility.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## SDM1S

### On-Off Road Adaptability

The SDM1S is a drive position tire for heavy duty trucks driving in mixed applications. The large tread blocks and deep groove tread design improve puncture and chunking resistance as well as traction. The groove design effectively reduces stone retention. A unique tread compound improves puncture, cut, and scratch resistance making this tire specially useful in extreme off-road applications.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## SDM20

### Durable Heavy Loader

The SDM20 is a drive tire engineered for short distance travel, within 100km, in mixed road applications and allows for 250% overloading capacity while driving within 60km/h.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S909

### Good Heat Dissipation

The S909's unique tread design and compound ensure uniform wear for a longer tread life and reduce stone retention. The open shoulder design allows the tire to run cool.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S910

### Puncture Resistance

The S910 is a drive tire for trucks driving in mixed applications. The tire is designed specifically for military on and off road applications. Offering improved grip as well as puncture and burst resistance, this tire is able to tackle any extreme road conditions.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S911 Strong Traction

The S911's bead is designed to improve durability while the special tread design reduces stone retention and improves traction.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## STM1

### On-Off Road Adaptability

The STM1 is a trailer position tire for trucks driving in mixed road applications. The strengthened bead construction and shoulder design improve durability, scratch resistance and help to promote even wear. An open shoulder helps with overall heat dissipation. A unique groove design improves driving stability, handling and grip while also reducing rolling resistance for better fuel economy.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)

## S801

### Puncture Resistance

The S801 utilizes a varied pitch tread pattern which helps to reduce noise emissions while the closed shoulder design improves driving stability and promotes even shoulder wear.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S813A

### Long Mileage

The S813A is an all-position truck tire equipped with shoulder grooves that effectively improve heat dissipation for effectively longer mileage. An improved running surface and tread groove design increase wear resistance. Three main grooves offer effective handling, braking, and traction performance.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)	
CN	12R22.5	152/149K	18	18.5	9.00	1085	300	19.84	3550	3250	930	135

## S815

### High Abrasion Resistance

The S815 is a mixed service tire featuring a chip-resistant compound ideally suited for off-road and construction applications. A zigzag main groove pattern reduces stone retention, while maximizing traction under all applications. Sidewall protectors are engineered to provide enhanced case protection.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S816

### Low Heat Generation

The S816 has reduced noise emissions thanks to the varied pitch tread pattern, while the high strength casing and reinforced bead improve service life. A closed shoulder design guarantees good stability and promotes uniform shoulder wear.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S825

### High Wear Resistance

The S825 is an all-position mixed service tire engineered with a special rubber compound which improves scrub resistance. The stone ejectors within the groove reduce stone retention while the angled tread blocks deliver excellent wet traction.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S828

### Skid Resistance

The S828 is an all position tire for long-distance transport vehicles driving on highway and normal roads. The tread pattern design improves traction and grip, and the high strength casing and tread improve driving safety.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S826

### Puncture Resistance

The S826 is an all position tire designed for short and medium distances in on and off road applications. The enhanced structure design boosts tire durability while the special tread compound improves puncture resistance. Tread pattern is designed to offer improved handling and traction.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S850

### Versatile Heavy Loader

The S850 is an all-position 250% load capacity truck tire designed for heavy-duty vehicles driving in mixed road applications.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## SAM05

### Puncture Resistance

The SAM05 utilizes a sturdy tread block design that provides powerful traction and off-road mobility.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S861

### High Wear Resistance

The new S861 is designed for short to mid-range standard load trucks running on paved roads. The economic tread design improves uniform wear for a longer tread life.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## SAM86

### On-Off Road Adaptability

The SAM86 utilizes a shoulder design that promotes even wear performance while the reinforced belt design improves tread rigidity, wear resistance, and impact resistance. The tread is designed to provide improved tire adaptability.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

## S889

### Driving Comfort

The new S889 is an all-position tire for long haul applications. Three main grooves with a zigzag tread design provide great stability and driving comfort. Block sipes improve tread softness for better wet traction.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.

S690

## S690 Coach

The S690 is an all-position tire designed for standard load coaches traveling at high speeds in long-haul applications.

Size	L.I./S.R.	P.R.	T.D. mm	RIM inch	O.D. mm	S.W. mm	S.L.R. inch	L.C.C.				
								Single (KG)	Dual (KG)	A.P. (KPA)	A.P. (PSI)	
CN	12R22.5	152/149L	18	16.5	9.00	1085	300	19.84	3550	3250	930	135
CN	295/80R22.5	152/149M	18	16.5	9.00	1044	298	19.17	3550	3250	900	130

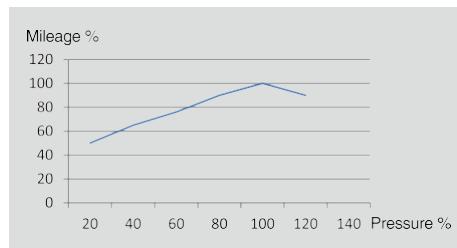

### Important Tips for Optimal Tire Performance:

- ① Maintain optimum air pressure
- ② Inspect tread grooves to ensure tires are safe and legal
- ③ Visually check for tire damage

**Ensure you check your tires once a month and before long trips to maintain performance and ensure safety.**

### Why is it important I have the correct tire pressure?

A tire at optimum air pressure will ensure your safety, provide greater driving performance, improve tire life and reduce fuel consumption. Mileage, environment, and temperature changes all affect the pressure of your tires. An over-inflated tire will increase tire stiffness which influences driving comfort and can cause unnecessary reverberations. This can also increase the probability of tire damage and accelerate tread wear.

**Note:** Statistics are from the China National Rubber Tire Quality Supervision and Inspection Center  
<<Vehicle Tire Usage and Case Analysis>>

### Where do I find the optimum tire pressure for my vehicle?

Tire sidewalls conveniently provide recommended tire pressure levels. Maintaining proper tire pressure is the most important way to extend the life and durability of your tires. Under-inflation is the main reason for a majority of serious tire ruptures, delamination, or punctures. A low tire pressure can reduce the load bearing capabilities of a tire, increase shoulder wear, cause excessive bending in the sidewall, and reduce rolling resistance resulting in overheating or internal damage.

### How do I check my tire pressure?

- 1) Make sure to purchase a certified air pressure gauge.
- 2) Tires must be checked in a cold "state" (at least three hours after driving).
- 3) Insert the gauge into the valve.
- 4) Compare the measured air pressure level with the optimum tire pressure.

### Why is it Important I Check for Tire Wear?

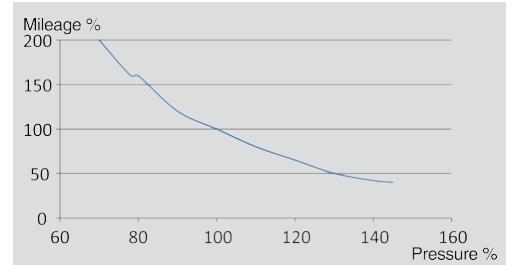

When the tread depth of your tire reaches 1.6mm, be sure to replace or re-tread them immediately. All new tires have a wear mark indicator, and when the tread is finally moved down to that level, the smooth surface of the tread groove will reveal the wear mark. Most of the accidents in wet weather are caused by worn-out tires, while excessive wear is also more likely to cause punctures.

### Why is it Important I Check for Tire Damage?

A tire with any signs of damage is susceptible to tire separation, puncturing, etc.; therefore it is extremely important to often check for signs of damage on your tires (at least once a month). If in doubt, let a tire dealer check for you. If you find any abnormal damage, wear, ruptures, bulges, or leaks you should immediately remove the tire for inspection. Do not do any temporary repairs or use the inner tube to substitute for correct/certified repairs.

### Do Not Overload Your Vehicle

To know your vehicle loading limits, check the owner's manual. Over-loaded vehicles will cause tires and other parts of the vehicle take on additional pressure. This will reduce handling, fuel economy, and possibly cause tire failure. An overloaded tire is also susceptible to serious ruptures, component separation or punctures. The load capacity of the new tire should not be lower than the capacity marked on the tire label, and remember that the optimum rim width is critical to proper load distribution and tire performance. When used on light trucks, multipurpose vehicle or trailers, the maximum load capacity marked on the sidewall of the tire should be reduced by 10%

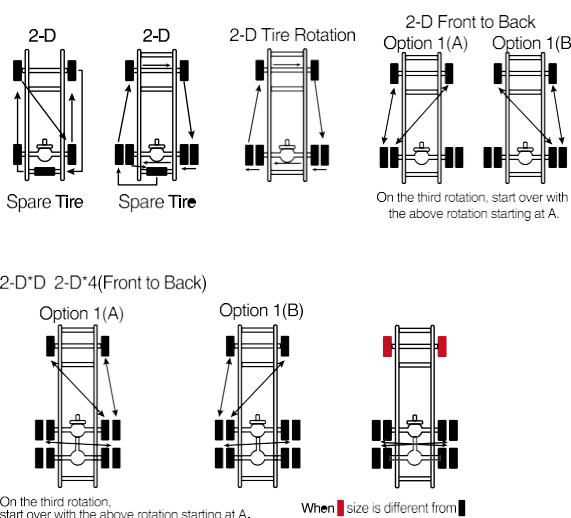

**Note:** Statistics are from the China National Rubber Tire Quality Supervision and Inspection Center  
<<Vehicle Tire Usage and Case Analysis>>

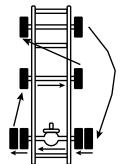

### Suspension Maintenance, Wheel Positioning and Dynamic Balancing, and Tire Rotation

Non-periodic tire replacement, suspension parts wear, dynamic balance, misalignment all will lead to excessive vibration or uneven wear. Tire rotation should be done according to the recommendations of the vehicle manufacturer, or at least every 10,000 km.

### Truck / Bus Tire Rotation Diagram

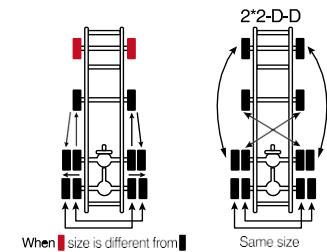

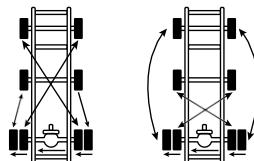

### 2\*2-D Tire Rotation

If the front and back axle wheel sizes are different, you should only rotate them in positions with the same sizes.

### 2\*2-D (Front to Back)

### The Importance of Tire Replacement

A timely tire replacement is critical to driver safety and also influences vehicle lifespan and performance. You should replace a tire if you see any tire erosion or problems that are impossible to repair.

Before replacing the tires, be sure to refer to the owner's manual and follow the advice of the vehicle manufacturer regarding the replacement of the tires.

Replacing the size or type of tires will seriously affect the vehicle's operating and safety performance.

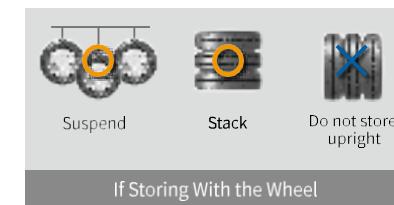

When selecting other tires that are different from the originally installed tires, consult a professional installer to ensure that the appropriate installation spacing, load capacity and inflation pressure are selected. You should not exceed the maximum load and inflation pressure marked on the sidewall of the tire.

When replacing tires, you must use tires with the same outer diameter and load capacity. Make sure to adjust the inflation pressure to avoid overloading your tires.

For correct load and inflation data, see the Tire and Rim Association's Load and Inflatable Tables, ETRTO or JATMA standards.

### Tire Storage Methods

Before putting your tire(s) in storage, check for signs of abrasion and/or damage and store according to the following directions.

If Storing With the Wheel

If Storing Without the Wheel

### User information for truck and bus tire

1. Always deflate the tire completely before removing lugs or side rings.
2. Never use rim parts of different manufacturers or different sizes.
3. Never mount tires on rims which are damaged or not smooth and clean.
4. Always clean and inspect the rim. Lubricate beads and rim flanges for tubeless tires. tube and rim side of flap with an approved rubber lubricant.
5. Always be sure that rim components are properly seated before inflating.
